International Conference on Emerging Computational Intelligence

Projects

Liberty Classes Project I have designed and developed a comprehensive Liberty Classes coaching website using HTML, CSS, JavaScript, PHP, and SQL. Leveraging my expertise in front-end development (HTML, CSS, JavaScript), I crafted an intuitive user interface that enhances user experience and engagement. With back-end proficiency in PHP and SQL, I ensured seamless functionality, robust data management, and secure user authentication.

Mini Book Hub I have also created a Book Hub platform utilizing the same technology stack of HTML, CSS, JavaScript, PHP, and SQL. This project showcases my versatility in web development, as I applied similar principles of intuitive design and robust functionality to create a dynamic hub for book enthusiasts.
  • User can add as well as remove the items from the cart.
  • It has user authentication using login feature.
